

UTILIS, SPECIALIST AND LEADER IN INTEGRATED INFRASTRUCTURE SOLUTIONS

- ENERGY SELF-SUFFICIENT
- WATER STORAGE AND PURIFICATION
- HEATING AND AIR CONDITIONING
- NEGATIVE PRESSURE

ROLE 1 | 2 FORWARD
FORWARD MEDICAL POST

DAMAGE CONTROL SURGERY AND RESUSCITATION
PRIOR TO CASUALTY EVACUATION TO ROLE 3

UTILIS has the experience and expertise in designing and integrating large-scale infrastructure, such as Role 2 medical facilities, capable of supporting a 1,000-person force. A turnkey solution including an operating theatre, an intensive care unit, and ten inpatient beds.

INTEGRATION

ROLE 2 BASIC | ENHANCE | 3
MEDICAL AND SURGICAL FIELD HOSPITAL

ADVANCED AND SPECIALIZED SURGERY
PRIOR TO STRATEGIC MEDICAL EVACUATION OUT OF THEATRE

This medical complex, composed of one or several operating theatres, as well as medical imaging equipment, a diagnostic laboratory, and sometimes specialized consultation rooms (dentistry, ophthalmology, etc.), provides comprehensive and multidisciplinary care for wounded personnel — from diagnosis to psychological support.

PARTNERSHIPS
OF EXCELLENCE

The story of UTILIS began in 1997 with the design of an ultra-rapid deployment tent for firefighters. Its originality lay in its visible metal-textile frame — a true innovation and revolution in the history of both civilian and military tents. Since then, UTILIS has become a **leader** in its field, demonstrating year after year its **ability to innovate** and design tactical solutions for command posts, camps, collective protection, decontamination, and field hospitals — serving the military, civil protection agencies, and NGOs.

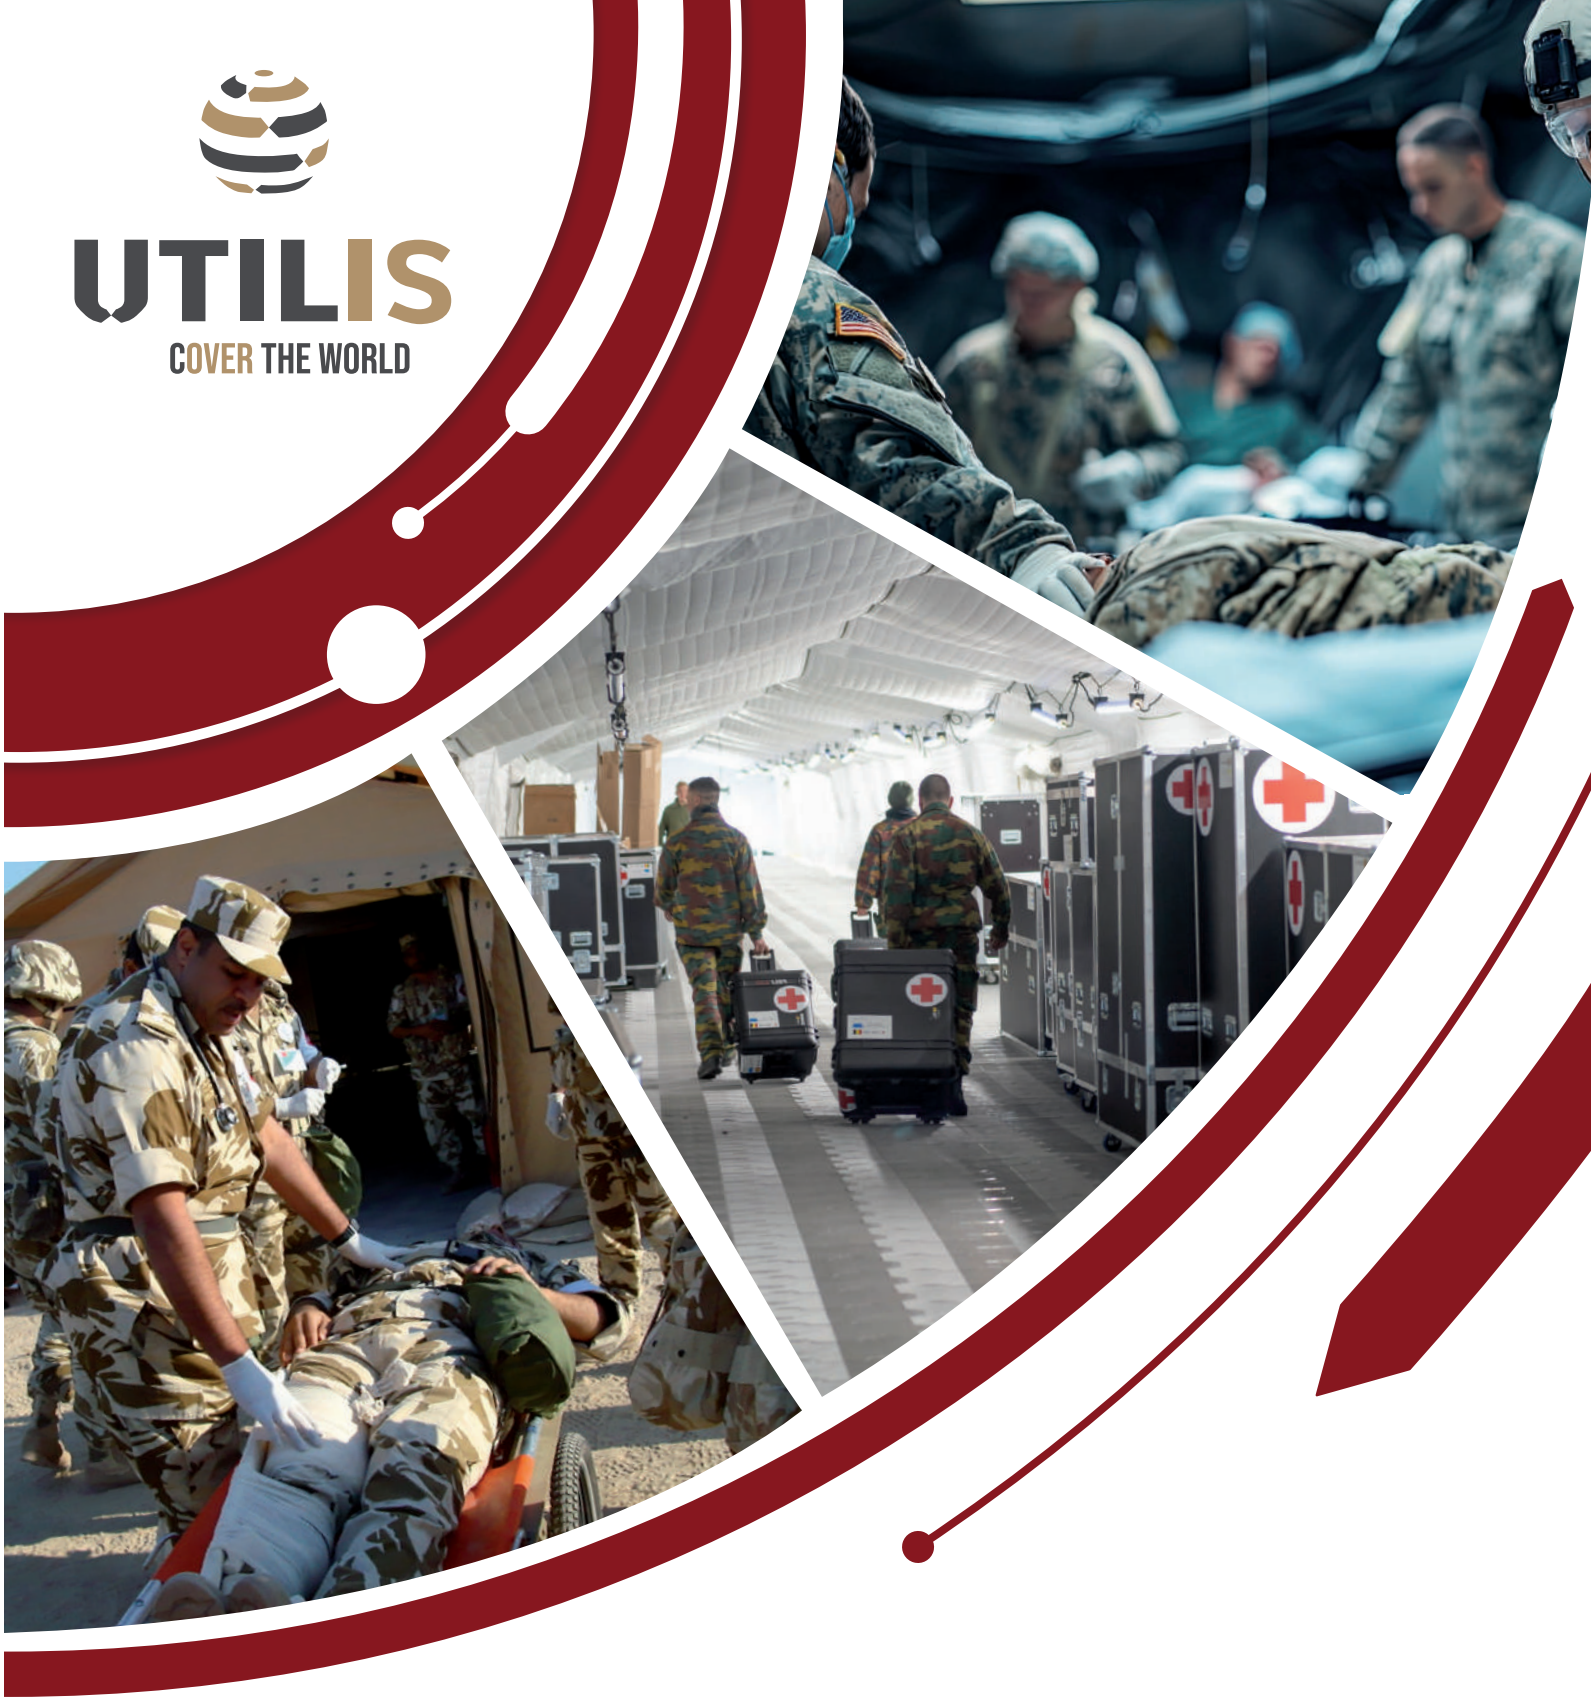

Our systems are entirely designed and manufactured in France.

MILITARY MEDECINE

MOBILE INTERVENTION AND MEDICAL CARE SOLUTIONS
COMPATIBLE WITH HIGH-INTENSITY OPERATIONS

OUR SOLUTIONS TO STAY AS CLOSE AS POSSIBLE TO THE WOUNDED

PROVIDING AID IN ALL CIRCUMSTANCES AND IN ALL LOCATIONS

SIMPLIFIED DEPLOYMENT OF YOUR MEDICAL ASSETS

SPEED AND MOBILITY

Rapid deployment capability is an operational imperative for military forces. Our mobile and rugged solutions enable record-time setup and teardown, ensuring maximum responsiveness to changing field conditions.
Our objective: to reduce deployment time and provide immediate medical care as close as possible to the wounded.

INTEGRATION AND MODULARITY

We integrate all the essential equipment you need for your mission. From the design phase, our systems are tailored to **your specific operational requirements** (medical services, CBRN, logistics, etc.). Medical equipment, water treatment, energy production... tailored to your requirements and the level of autonomy needed.

ADAPTION ET AGILITY

In a constantly evolving operational environment, our structures provide **optimal tactical flexibility** : they adapt to all configurations, from forward aid stations (Role 1) to mobile surgical units (Role 2) and deployable hospitals (Role 3).

PROVIDING DOCTORS WITH THE MEANS TO SAVE LIVES

Operating in conflict zones requires robust and self-sufficient infrastructure. Our solutions provide secure shelter, protection from the elements, and energy autonomy - ensuring continuity of care under any circumstances.

GIVING THE WOUNDED THE BEST CHANCE OF SURVIVAL AND RECOVERY

Designed for mobility and responsiveness, our solutions ensure continuity of care across the entire theatre of operations, reducing the critical time between injury and specialized treatment.

Among its latest innovations, UTILIS has developed the **CROSSMED™** – a rugged, all-terrain mobile aid case. In just a few minutes, first aid can be delivered, significantly increasing the chances of survival.

Another major innovative solution, the **MAG 20™** is the lightest and most compact system capable of providing an 18 m² versatile operational space to shelter both wounded personnel and medical teams.

INTEROPERABILITY

Our equipment is **compatible with international military standards**, ensuring seamless integration into joint allied missions and multinational operations.

- ✓ INCREASE YOUR TACTICAL MOBILITY.
- ✓ MINIMIZE YOUR LOGISTICAL FOOTPRINT.

CROSSMED

FIRST AID

- Deployable in 2 minutes
- Modular and illuminated
- Volume: 345 L – 76 x 63 x 117 cm
- Puncture-proof wheels

MOBILE SUPPORT CASE FOR ASSISTING SOLDIERS IN HOSTILE ENVIRONMENTS

MAG 20

MEDICAL POST

- Forward Surgical Medical Unit – MCV
- 18 m² deployed in 1 mn 30 sec
- Forward-position decontamination
- Air-droppable

ULTRA-LIGHT TENT FOR SAFE TECHNICAL OPERATIONS DEPLOYMENT

ELYTRON

ROLE 1 / 2 F

- Command Post
- Hospital / Surgery
- Laboratory Analysis
- Decontamination
- Air-deployable
- Rugged design

MULTI-PURPOSE CONTAINER OPERATIONAL IN UNDER ONE HOUR

TMS 36 / 54

ROLE 2 / 3

- Basic first aid
- Medical triage
- Dental / Surgical / Medical care
- Stabilization before evacuation to Role 3 or 4
- Ruggedness

INTEGRATED MULTI-LEVEL FIELD HOSPITALS FOR DEPLOYMENT
